PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years of experience building full-stack web applications and microservices with **.NET** and **React** for regulatory-compliance and ERP platforms. At **Kaz Software**, built core **RegAnalytics** modules, shipped LLM-powered streaming content generation, cut document-editor autosave latency by **~80%** with Redis caching, and built serverless **AWS** pipelines for document processing. Leads architecture decisions, mentors **3** engineers, and owns delivery from planning to production, using AI-assisted tools (Claude Code, Cursor, GitHub Copilot, MCP) to ship faster.

TECHNICAL SKILLS

Languages	C#, TypeScript, JavaScript, SQL
Backend	ASP.NET Core, ASP.NET MVC, Web API, Entity Framework Core, LINQ, SignalR
Frontend	React, Redux, Angular, Tailwind CSS
Databases & Caching	MSSQL, MySQL, MongoDB, Redis (ElastiCache)
Cloud & DevOps	AWS (Lambda, Step Functions, S3, SQS, EventBridge, IAM), Docker, Jenkins
Architecture	Microservices, Domain-Driven Design, Clean Architecture, CQRS, Event-Driven, Serverless
AI & LLM	OpenAI API, LLM integration with streaming responses, Claude Code, Cursor, GitHub Copilot, MCP
Testing	xUnit, Moq
Tools & Practices	Git, Jira, Postman, Swagger, Agile (Scrum), Code Review

WORK EXPERIENCE

Kaz Software

Dhaka, Bangladesh

Senior Software Engineer — May 2026 – Present

- Lead development of **RegAnalytics** and **RegPlus**, regulatory-compliance platforms built on **.NET** and **React**.
- Built LLM-powered content generation that streams responses to the editor in real time, using the surrounding document as context, **cutting first-draft writing time by ~40%**.
- Designed a **Redis (ElastiCache)** caching layer for document-editor autosave, reducing latency from **~1.2 s to under 250 ms**.
- Built serverless **AWS** pipelines (Lambda, S3, SQS, EventBridge) for document processing and background jobs.
- Lead technical design reviews, mentor **3** engineers through code review and pairing, and own features from planning to production.

Software Engineer — May 2023 – April 2026

- Built the **RegBrief** and **Workspace** modules of **RegAnalytics** from an early stage, letting compliance teams create, organize and share regulatory briefings and documents in one place.
- Contributed to the **TPA** and **WTA** modules.
- Worked with product managers and UX/UI designers to define requirements and turn designs into production features across the full stack.

AKIJ iBOS Dhaka, Bangladesh

Software Developer January 2021 – April 2023

- Built and maintained ERP modules for **Procurement**, **Inventory** and **Approval Management**.
- Developed **RESTful APIs** in **.NET Core (C#)** to integrate ERP modules with other business systems.
- Fixed production bugs and tuned slow SQL queries, improving platform stability and report performance.
- Delivered client-specific ERP customizations with cross-functional teams.

KEY PROJECTS

LexisNews — Tax-compliance news publishing platform with webhook API delivery
Built the webhook delivery API that pushes new articles to subscriber systems.
C# · .NET · Web API · MSSQL · TypeScript · React

XML Tool — Structured data conversion service with custom XML export
Built the conversion engine that turns structured data into custom XML exports.
C# · .NET · Web API

EDUCATION

B.Sc. in Computer Science and Engineering 2018 – 2021
East Delta University, Chittagong, Bangladesh

Diploma in Engineering, Computer Technology 2013 – 2017
Chittagong Polytechnic Institute, Chittagong, Bangladesh
